

Green ratio: 19.91% Public space ratio: 9.38%

Roads: 20 Green: 5 Public: 6 Phases: 3

agent.1: EN name + Logo + brand palette

agent.2: 7 global cases + ecosystem diagram

agent.3: 10 scenario cards (6-col matrix) + 3 validation

agent.4: 3 AI landmarks + honor system

agent.5: 3-layer narrative + signage + i18n

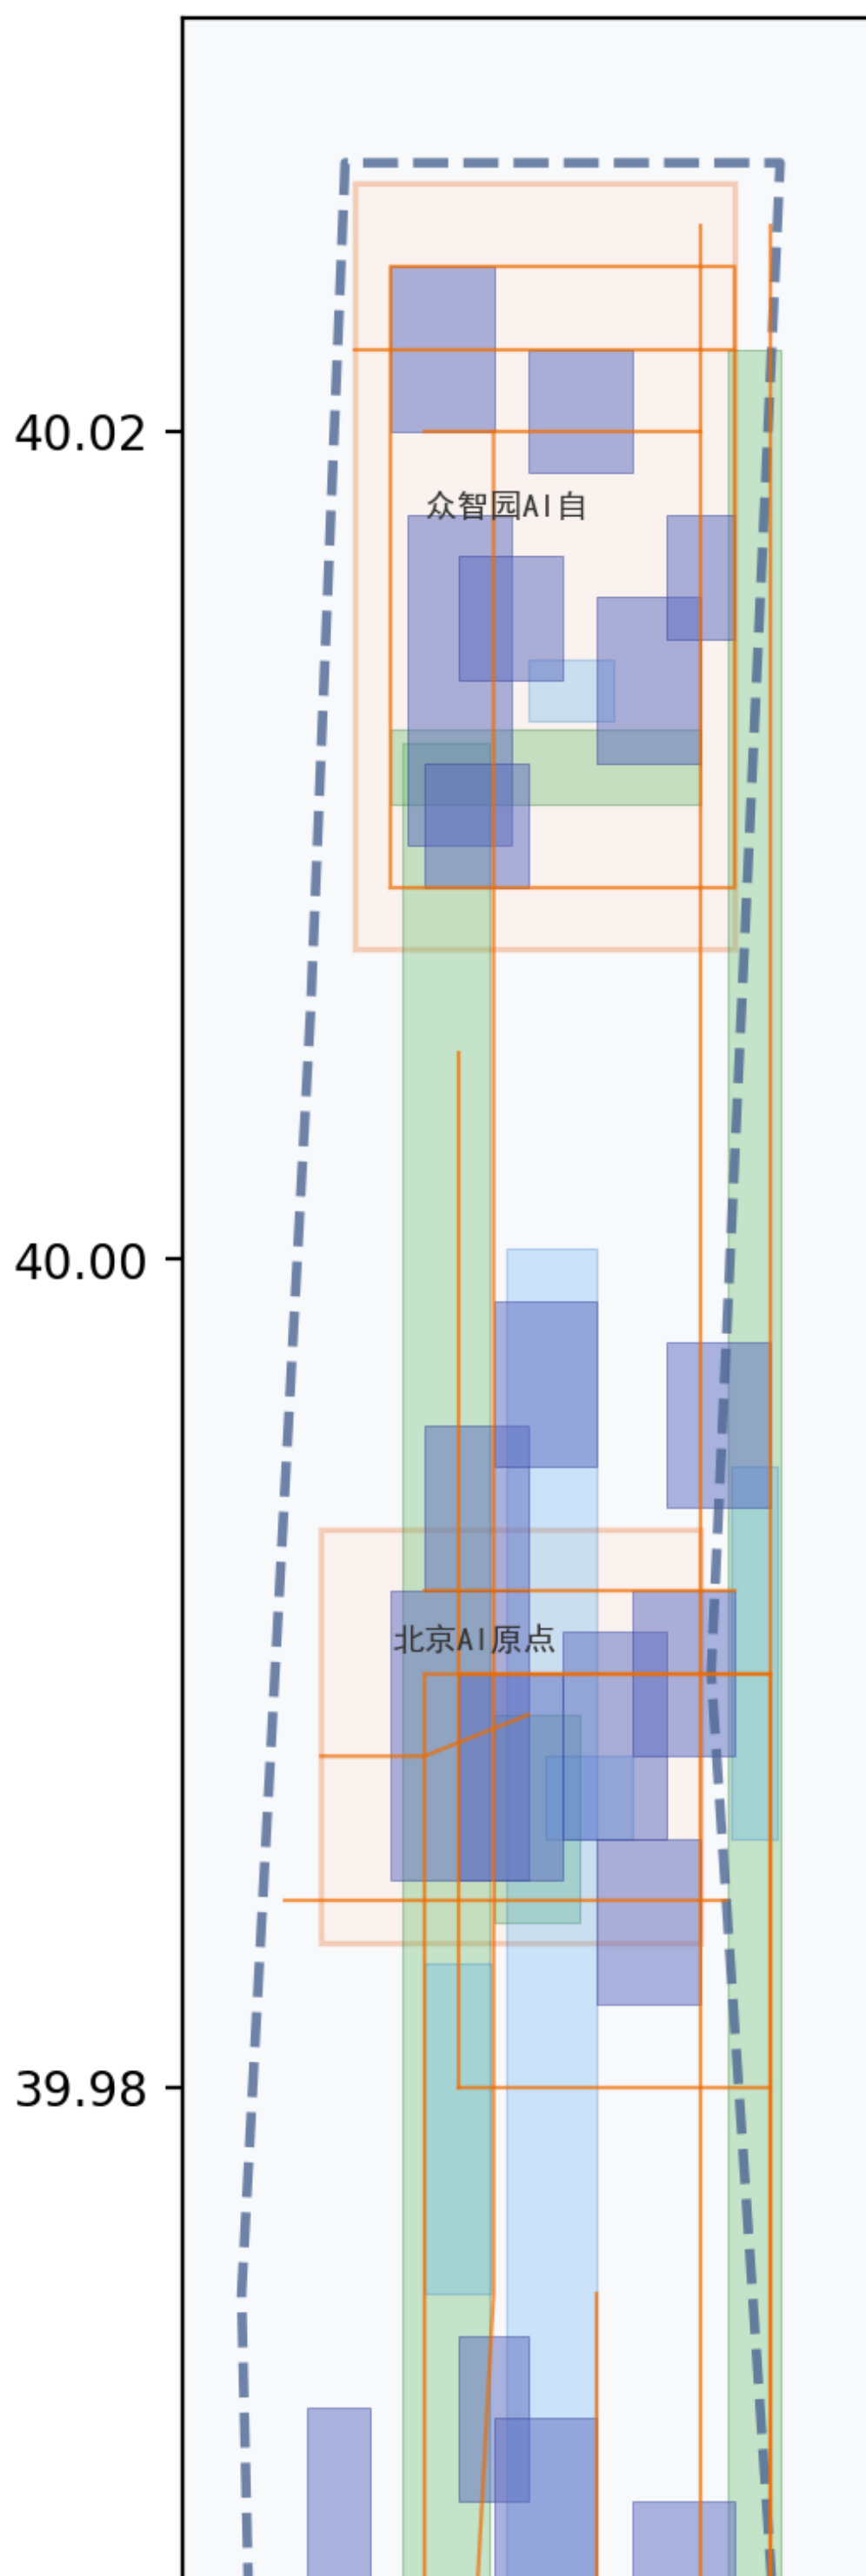

agent.6: annual calendar + dev council + 90-day opening

P2: Vulnerable groups (elderly/child/disabled/low-income/non-digital)

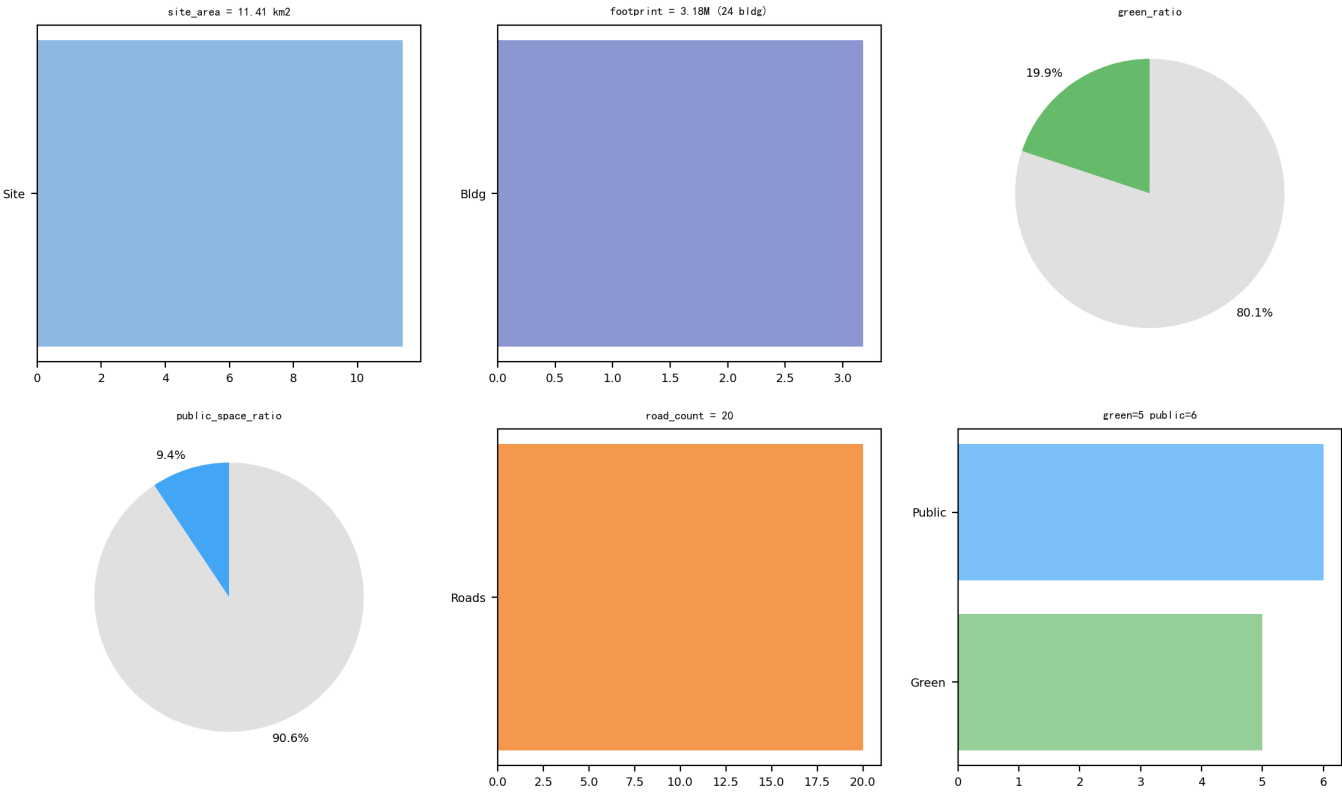

Public participation: 10-seat council, 15-day reply

Algorithm correction: 3 complaints -> auto-downgrade

JZ-AI-SC Overview

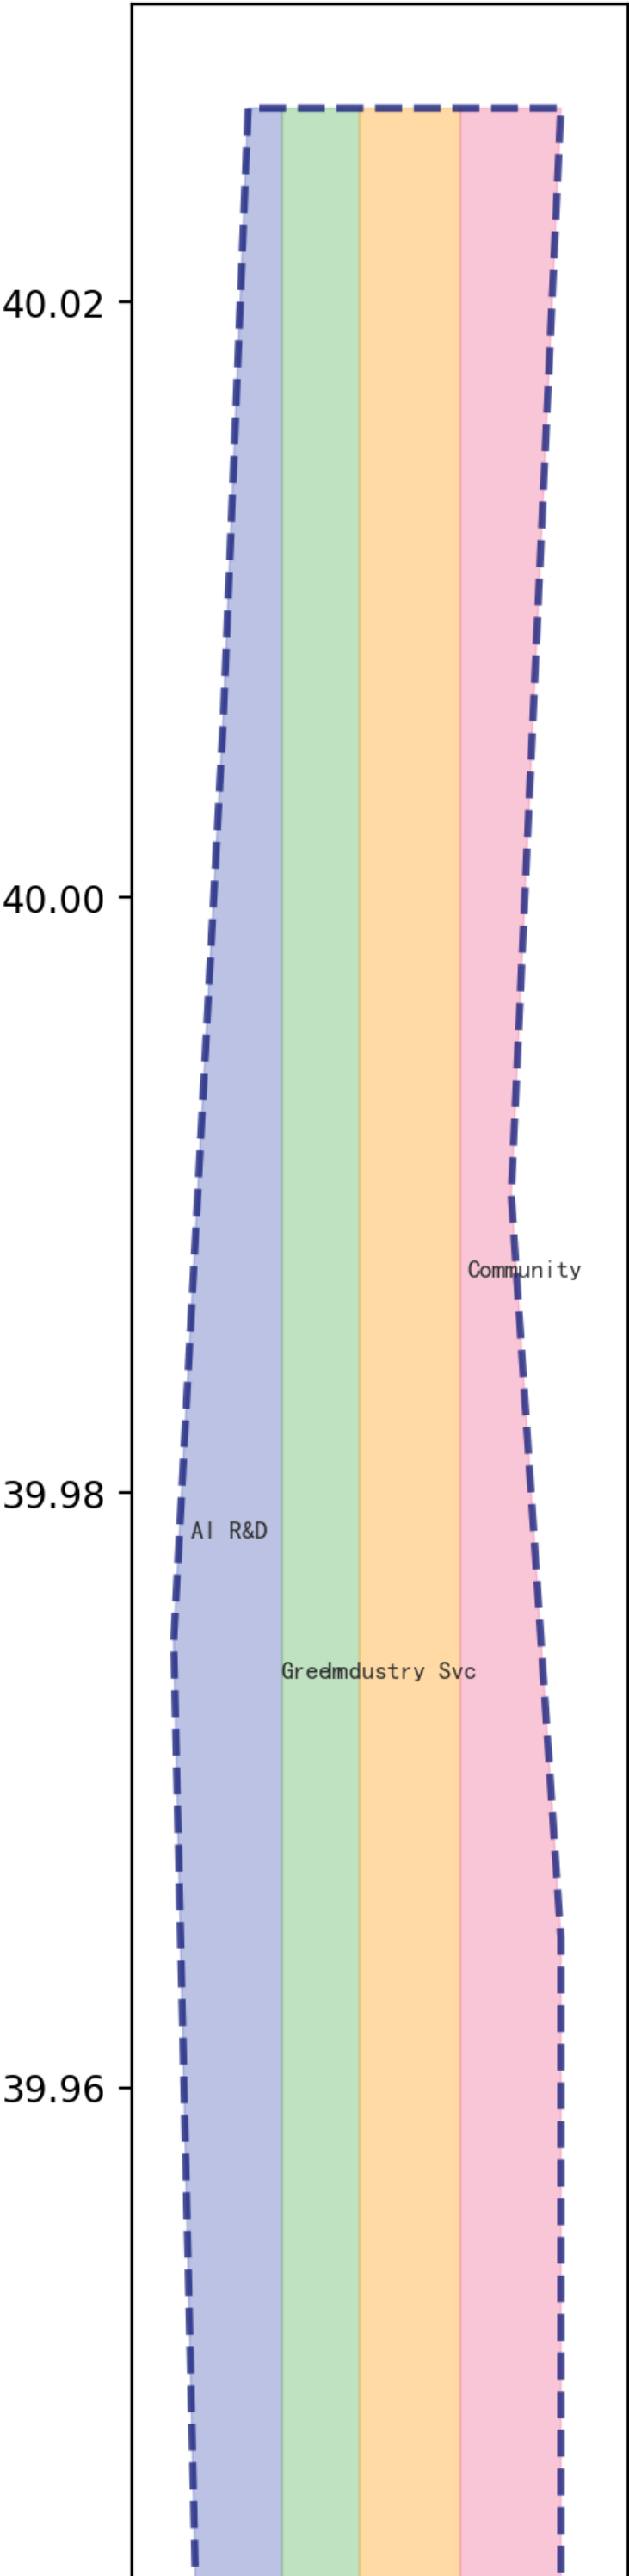

Metrics Evidence Chain

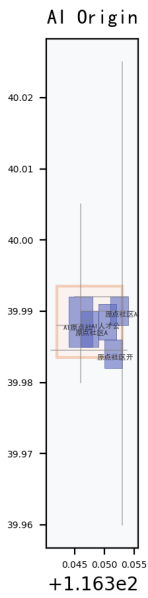

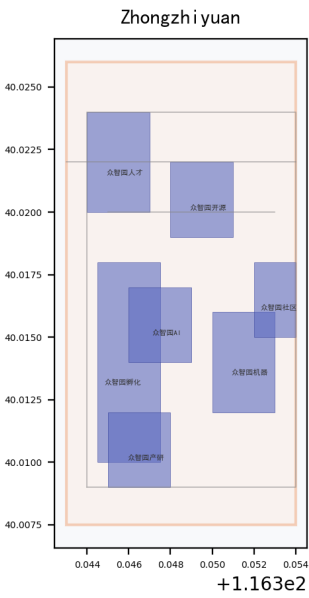

provisional boundary | EPSG:4548 | formal geometry required for recalculation

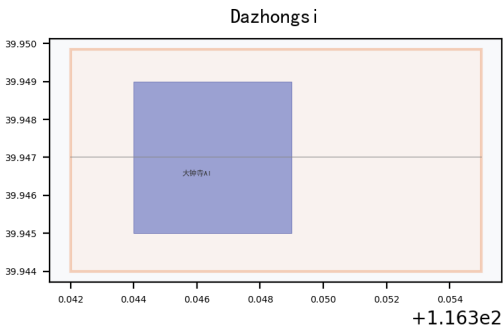

Land Use Structure

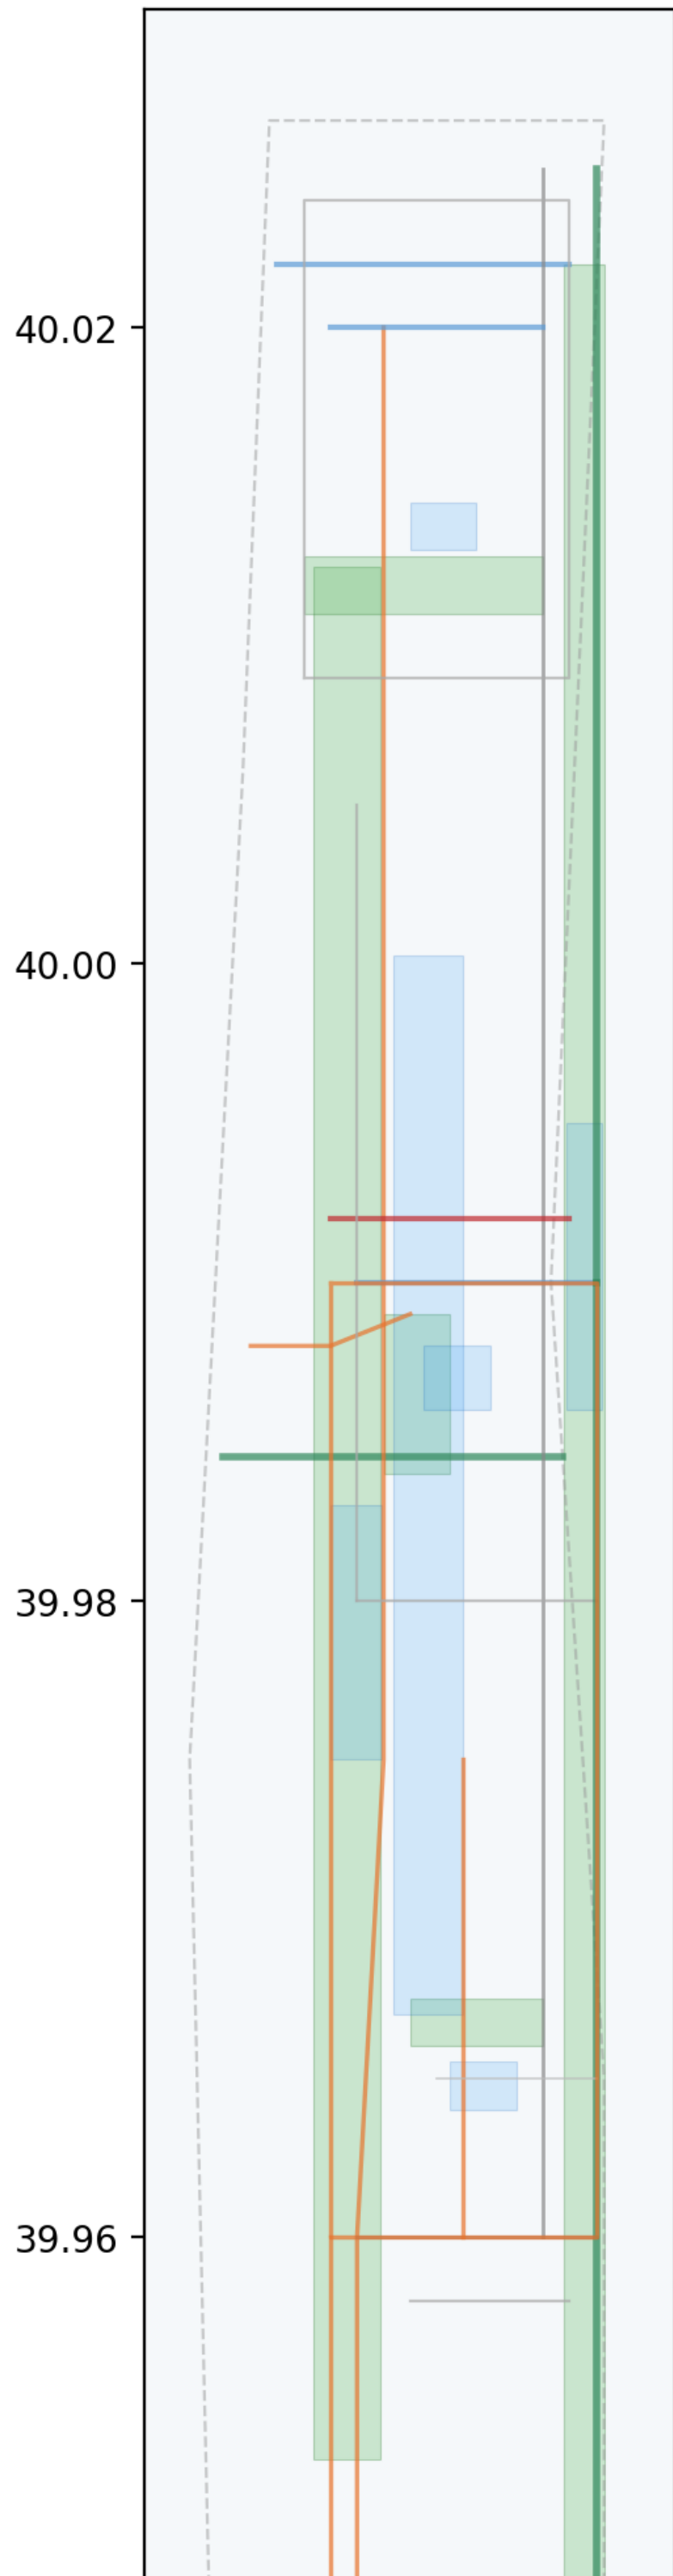

Three Key Areas Detail I

provisional boundary | EPSG:4548 | formal geometry required for recalculation

Blue-Green & Mobility Network

Network: 20 roads (greenway 4, cycle 3, ped 5, secondary 2, branch 3, transit 2, local 1)
Green: 5 (park spine / eco corridor / pocket parks / green axis / river buffer)
Public: 6 (open source plaza / maker plaza / AI exhibition / event nodes / community living room)
Vulnerable: elderly/child/disabled/low-income/non-digital users
Governance: 10-seat council, quarterly meetings, 15-day reply, 3-complaint auto-downgrade

Phasing & Risk

Phase 1 (0-10mo): Initial Community deepening
Phase 2 (10-30mo): Dazhongsi + Xiaoyuehe
Phase 3 (30-60mo): Dazhongsi + Xiaoyuehe

Risk controls:

- provisional boundary: recalc when official polygon available
- FAR/height/density: unknown (pending regulatory controls)
- Privacy: data minimization, no personal trajectory collection
- Copyright: per-asset rights registry in copyright_statement.md
- Algorithm: 3 complaints -> auto-downgrade to human review
- Noise: 55dB nighttime limit, 100m buffer for low-noise activities
